

## Prerequisites

### IBM Cloud Service

Date	27 October 2022
Team ID	PNT2022TMID26661
Project Name	Project – Smart Farmer-IoT Enabled smart Farming Application

### IBM Watson IoT Platform

The screenshot displays the IBM Watson IoT Platform interface. The main heading is "Browse Devices". Below it, there are two tabs: "All Devices" (selected) and "Diagnose". A brief description states: "This table shows a summary of all devices that have been added. It can be filtered, organized, and searched on using different criteria. To get started, you can add devices by using the Add Device button, or by using API." Below this is a search bar labeled "Search by Device ID". To the right of the search bar is a "Device Simulator" toggle switch, which is currently turned off. Below the search bar is a table with the following columns: "Device ID", "Status", "Device Type", "Class ID", "Date Added", and "Descriptive Location". The table contains one row with the following data: "12345", "Disconnected", "NodeMCU", "Device", "Oct 30, 2022 6:37 PM", and an empty field. Below the table, there is a pagination bar showing "Items per page: 50" and "1-1 of 1 item". At the bottom right of the page, there is a status bar that says "0 Simulations running".

Device ID	Status	Device Type	Class ID	Date Added	Descriptive Location
12345	Disconnected	NodeMCU	Device	Oct 30, 2022 6:37 PM
